

September is Childhood Cancer Awareness Month

At Elevate, we stand alongside those who refuse to accept the status quo of childhood cancer treatment. Our mission is clear: empower patients, caregivers, researchers, medical practitioners, and industry partners to expedite therapy development and drive informed decision-making. Elevate Wilms is a core initiative within Elevate Childhood Cancer Research and Advocacy.

OUR MISSION

To dramatically improve and save the lives of those diagnosed with childhood cancer. From diagnosis, through treatment, to survivorship and in some cases, the end of a child's life.

Childhood cancer is the #1 disease killer of our children

Most drugs used in childhood cancer treatment are 40-60 years old

95% of survivors develop a major medical condition from their cancer treatment by the age of 45

Wilms Tumor is the most commonly diagnosed kidney cancer in children & the most common abdominal cancer.

OUR APPROACH

Education: Providing comprehensive resources to empower parents and caregivers with knowledge from diagnosis through survivorship and end-of-life care.

Advocacy: Championing policies and programs that prioritize improvements to childhood cancer treatments.

Strategic Investment: Facilitating connections between advocates and renowned researchers to address treatment concerns and infuse funds into pinch points that are identified to expedite and pave the way for innovative solutions.

Empowerment. Advocacy. Progress.

Together, we can make a difference. Join Elevate in our mission to reimagine treatment for childhood cancer and provide hope for future generations.
